The Arnold School of Public Health offers graduate and undergraduate academic training. The endowed and fully accredited Arnold School is the only school of public health in South Carolina and offers a full spectrum of degree programs across all public health disciplines. The Arnold School has a 34-year history of engagement at the local, state, and national levels, and is the leader among USC's health science colleges and schools in the attainment of extramural funding.

GOALS
- Achieve and maintain research excellence as demonstrated by the creation of knowledge integral to public health
- Provide educational programs of excellence for public health professionals and scholars, statewide and worldwide
- Utilize available knowledge to improve health and address the environmental issues that face South Carolina, the nation, and the world community
- Provide the infrastructure and resources to meet the goals of education, research, and professional service.

PARTNERSHIPS
- The Arnold School has several Centers and Institutes that partner with community leaders to address public health issues facing the state and the nation.

QUICK FACTS
Hallmarks/Rankings
- The Arnold School’s program in exercise science and kinesiology was ranked No. 1 in the nation

Fall 2009 Enrollment
- 761 undergraduate students
- 655 graduate students

Faculty Size (approximate)
- 116 faculty: 60 full-time tenure-track faculty, 44 non-tenure-track, 8 research associates, 4 post-doctoral

PROGRAMS OFFERED
- The Arnold School of Public Health offers a variety of graduate degree programs of study across six academic departments:
  - Communication Sciences and Disorders
  - Environmental Health Sciences
  - Epidemiology and Biostatistics
  - Exercise Science
  - Health Promotion, Education, and Behavior
  - Health Services Policy and Management

- The Arnold School of Public Health introduced two new undergraduate degree programs in the fall of 2009, joining only seven other accredited schools of public health to offer undergraduate majors nationwide. In adding the Bachelor of Arts and Bachelor of Science programs, the school aims to address an increasing shortage of trained public health workers in the state and nation.
